AWESOME SAUCE

FRESH LAUNDRY

READY TO USE ENZYMES

160 MILLION
BACTERIA PER ML

ELIMINATES
TRASH CAN ODORS

USE IN
MOP WATER

USE ON
WET CARPET

HEAVY
DUTY

AWESOME SAUCE READY-TO-USE is a liquid live bacteria that eats and digests organic waste and mal odors. This proprietary blend contains 160 million bacteria per milliliter and 7 bacterial strains. It's so powerful it'll even digest paper. We also added a built-in odor neutralizer with a fresh laundry scent that eliminates odors immediately while the enzymes are working. **AWESOME SAUCE READY-TO-USE** can be used in: grease traps, sewer pits, septic tanks and more.

DIRECTIONS FOR USE

You do not need to add water to this product before using. Shake well and apply when flow is lowest. Treat lower levels first to prevent blockage by materials released from higher levels.

Drain Lines, Down Pipes: Pour **AWESOME SAUCE READY-TO-USE** directly in the drain line opening. Use product 2 to 4 times weekly. Add product according to chart below. Start on the lowest floor and work one floor every day. Do not treat same floor twice. Once top floor is reached, continue treating only the top floor.

For 2" drain, use 4 oz.

For 4" drain, use 8 oz.

For 6" drain, use 12 oz.

For 8" drain, use 16 oz.

Grease Traps: For small grease traps less than 20 cubic feet, pour 4-5 ounces daily into sink or pipeline. For large grease traps, use 8-10 ounces daily.

Septic Tanks: For initial treatment use 16 oz. per 25 cubic feet capacity. For weekly maintenance pour 8 oz. directly into toilet and flush. If septic tank is clogged, add 1 gallon of product to the tank through the manhole.

Boats and Recreational Vehicles: Add 4 ounces per gallon of water in hold tank. Then use 2 ounces per gallon per week for maintenance. For dump stations, use 2 ounces per 50 gallons of tank capacity. Then use 1 pint per week for maintenance.

Toilets, Urinals, Drinking Fountains: Add 4-6 oz. daily, applying product under toilet or urinal rim. Allow product to run down into drain. Do not apply to drinking fountain spout.

Municipal Sewage Treatment Systems and Sludge Lagoon: Use 5-6 gallons per million gallons of daily flow. For preventative maintenance use 2 gallons per million gallons of daily flow for proper operation.

General Odor Control: To eliminate odors caused by vomit, urine, spoiled food, animal waste in places such as garbage cans, locker rooms, carpet, etc., spray directly on the malodor. This will let the bacteria ingest the material while the pleasant fragrance immediately neutralizes the odor.

NON-POLLUTING Meets all O.S.H.A. standards
