

TECHNICAL DATA SHEET

NAME: BEEBOPPER

PART NUMBER(S): AR122

PRODUCT DESCRIPTION:

Beebopper is a wasp and hornet killer spray designed for both industrial/institutional use and safe elimination of nests from a distance. Beebopper is designed to kill bees, wasps, hornets, and yellow jackets. The spray can shoot up to 20 feet, allowing treatment from a safe distance.

Features and Benefits:

- Targeted insect control: Kills wasps, hornets, and yellow jackets on contact.
- Fast-acting formula: Provides rapid knockdown and kill of insects.
- Distance spray: Shoots a stream up to 20 feet, allowing users to eliminate nests from a safe distance.
- Dielectric breakdown voltage: Rated to 57.2 KV (by ASTM Test Method D-877-87), making it safe for use around electrical equipment.
- EPA registered: Meets EPA Regulation Number 7754-44.
- 14 oz. aerosol can: Convenient and easy-to-use packaging.
- Active ingredients: Contains Tetramethrin and 3-Phenoxybenzyl-(1RS, 3RS; 1RS,3SR)-2, 2-dimethyl-3- (2-methylprop-1-enyl) cyclopropane carboxylate.
- Contains petroleum distillate.
- Worker safety: Enables professionals like utility workers and pest control technicians to safely eliminate nests in hard-to-reach or hazardous locations.
- Effective pest control: Quickly eliminates stinging insects, reducing the risk of stings and potential allergic reactions.
- Versatile application: Suitable for use both indoors (where food or feed are not exposed) and outdoors.
- Peace of mind: Helps keep outdoor areas like gardens, paths, patios, and lawns free from dangerous insects.
- Read the label carefully: Always refer to the product label for specific directions for use and safety precautions.

Effective Against:

- Bees, Wasps, Hornets, & Yellow jackets

Directions: Complete directions on product label

Control of Wasps, Yellow Jackets, and Hornets: Spray the nest early in the morning or evening when insects are less active. Spray only in calm conditions. Stand at a safe distance, never directly under the nest. Hold the container upright at arm's length and spray the nest opening first, then saturate the entire nest. Treated insects may fall out and die. Wait 48 hours before removing the nest. Rinse any desirable plant foliage contacted by the spray. **For Scorpions:** Stand 3 to 4 feet away and thoroughly cover the scorpion. Make sure it is dead before removing it.
