INDICATOR

NET CONTENTS: 25 LBS

This powdered detergent contains a balanced blend of special surfactants, builders, and citrus extracts to quickly strip grease, oil, dirt, grime and other deposits from concrete floors and other washable surfaces. This formula is safe to use on most surfaces including wood, plastic, metal and painted surfaces.

DIRECTIONS

FOR LIGHT CLEANING: Use 4-16 ounces (1/2-2 cups) of detergent per 5 gallons of water. Sponge, mop, or spray solution onto surfaces to be cleaned, and agitate if necessary to remove soil. Use with caution on finished floors, as some floor finishes are not detergent resistant and may be removed by this cleaner.

FOR GENERAL CLEANING: Use 16-32 ounces (2-4 cups) of detergent per 5 gallons of water. Difficult soils may require a stronger solution. Swab onto surface and allow to penetrate for 5-10 minutes, scrubbing with a bristled broom to agitate the soil. Rinse thoroughly with clean water. Use with caution on finished floors, as some floor finishes are not detergent resistant and may be removed by this cleaner.

TO CLEAN CONCRETE: For heavy grime and severe oil staining, wet floor with clean water, then sprinkle detergent powder directly onto soiled areas. Scrub with stiff broom, and allow to penetrate until deposits are loosened. Rinse floor with clean water.

FOR SOAK TANK DEGREASING: Use up to 1/2 pound per gallon of water. Hot water will provide optimum cleaning conditions. Cleaning will be faster in agitated tanks and when fresh solutions are used. Dry all cleaned parts to prevent flash rusting.

DISPOSAL

Dispose of contents/container to comply with local/regional/national/international regulations.
