FANCY FLOORS

FRESH CLEAN FRAGRANCE

CONCENTRATED FLOOR AND
SURFACE CLEANER
NO RINSE FORMULA

REMOVES GREASE,
DIRT & GRIME

USE IN SCRUBBER
& MOP WATER

CLEANS MARBLE
& TERRAZZO

SAFE ON
WOOD

SAFE ON VINYL
& LINOLEUM

NET CONTENTS: ONE GALLON (128 FL. OZ.)

FANCY FLOORS is a mild pH concentrated cleaner that cleans without dulling the existing floor finish. Fancy Floors can be used in auto scrubbers or a mop bucket, and is a no rinse formula. Surfaces it can be used on: marble, terrazzo, hardwood, bamboo, vinyl, ceramic, linoleum, stone, etc. Fancy Floors can be used in conjunction with virtually any floor-finishing product, and diluted at a variety of rates to customize the solution to the surface and type of soil being removed. So go ahead and get fancy!

FLOOR CARE TIPS

- Spot check on an inconspicuous area first.
- Floors should be damp mopped regularly. Accumulated dust and dirt cause unsightly scratches or abrasion that will significantly reduce finish durability and lead to frequent stripping and recoating.
- Floors should always be dry mopped before damp mopping. Removal of loose soil extends the life of cleaning solution significantly reducing chemical usage.
- Always pick up spills promptly. Dried-on liquids can be very sticky and require extra effort to remove. A little effort at the time of the spill will save a considerable amount of time during the damp mopping process.
- Regular use of walk-off mats at all entrances will catch damaging grit - significantly extending the life of your floor finishes.

DIRECTIONS

Dry mop floor with a treated dust mop to remove all loose soil.

MOP APPLICATION: In mop bucket equipped with wringer, dilute 2 - 3 ounces per gallon of warm water. Immerse mop into solution and wring out about one-half to two thirds of cleaner. Mop should not have water dripping off of it, but feel damp to the touch. Clean the floor using a gentle side to side motion, be certain to cover all areas of the floor. **NO RINSING REQUIRED.**

Heavier dirt accumulations of dried-on liquid spills may require a vigorous scrubbing action for complete removal. Floor with heavy soiling may require a stronger cleaning solution.

AUTOSCRUBBER APPLICATION: Dilute 1 - 2 ounces per gallon of warm water. Clean floor with a red pad, being certain to cover all areas of the floor. No rinsing required.

Heavier dirt accumulations of dried-on liquid spills may require a vigorous scrubbing action for complete removal. Floor with heavy soiling may require a stronger cleaning solution.
