## TECHNICAL DATA SHEET

**NAME:** MOSQUITO DONUTS

**PART NUMBER(S):** A412

### PRODUCT DESCRIPTION:

A **Mosquito Donut** looks like a small, beige donut which floats on standing water. As the donut slowly dissolves, it releases a bacterium which is toxic to all species of mosquito larvae. The active ingredient in Mosquito donut s is *Bacillus thuringiensis* subspecies *israelensis* (Bti). Bti is a bacterium that is deadly to mosquito larvae but harmless to other living things.

### Features and Benefits:

- Each donut kills mosquito larvae for 30 days or more.
- Each donut covers up to 100 Square feet of water, regardless of depth.
- Use mosquito donuts in any standing water including rain barrels, bird Baths, tree holes, elevator shafts, planter reservoirs, rain gutters, etc.
- Unused and dry donuts retain their potency indefinitely
- Approved For use in organic production.

### Use on:

Just float a biodegradable mosquito donut in water troughs, koi ponds, birdbaths, rain barrels, animal watering troughs, elevator shafts, or any place where water collects and remains for periods of time.

**Quantities:**  
100 UNITS/CASE
