OLD YELLER is a highly concentrated sewer tracing dye formulated for use in all types of sewer flow studies and pollution investigations. It creates an intense fluorescent yellow/green color for maximum visibility under a wide variety of conditions. This dye contains biodegradable, non-toxic ingredients. When used at the proper dilutions, it is harmless to wildlife, and will not affect the operation of sewer treatment processes. Non-natural fluorescent color promotes safe use and aids in controlling public reactions.

DIRECTIONS

Apply dye as required for proper study of flow. 1 to 2 gallons will impart visible color to approximately 12,000 gallons of water.
